

AKF Participates in Daylight Hour!

From 12 pm – 1 pm on Friday, June 19th, AKF will join Green Light New York in their efforts to create awareness and reduce energy demands to our national grid by turning off the lights for one hour in day lit spaces in all AKF offices.

The hours when daylight is most available (summer afternoons) coincides with peak demand. Typical energy rates lead to expensive costs during the demand window, and excessive demand is a contributor to climate change.

Green Light will track participants, estimating energy savings of the Daylight Hour, and publicizing the impact.

We're excited to be part of this event and we encourage you to join us.
